Re: Written *Ex Parte* Communication; WT Docket Nos.06-169, and 96-86 PS
Docket No.06-229

Dear Chairman Martin,

I retired as a Sergeant/Patrol Supervisor of the Massachusetts State Police in 1997 after a career of 35 years in public safety. I was a patrolman in the towns of Ware and Warren, MA. I transferred into the Metro Police in 1979. In 1992 the Metro Police merged with the Massachusetts State Police. I served at Wachusett Reservoir and Quabbin Reservoir in Central Massachusetts and at several barracks in Western Massachusetts. Throughout my career, I made a commitment to make my communities safe for everyone. Being able to communicate in an efficient and comprehensive way with other public safety agencies was very critical. That is why it is important that the FCC designate at least 10MHz of commercial spectrum for public safety use through a private partnership.

In order to develop this communication network, funding and a larger spectrum are essential. The plan proposed by Frontline Wireless provides both of these components. They plan to build out the network with private capital, which will allow the doubling of spectrum available to first responders.

This build out will serve 99 percent of the state, and will allow local agencies control over the system. The Frontline Wireless plan will make the job of current public safety officials easier and it will save lives in the future. I hope you will give this proposal your every consideration and look favorably on making the needed spectrum available.

Thank you for your time.

Sincerely,

A handwritten signature in dark ink, appearing to read "Frederick Hagman, Jr." with a stylized flourish at the end.
